

### BONUS YO-YO flower- Tutorial

1. Using a 4" circle, stitch long stitches around the edge while folding down as you go.
2. When you get all the way around pull until the string until it forms the little yo-yo. Stick your needle up through the center to the other side. Stitch your button down first

3. To achieve the gathered look of the flower so that it isn't a flat yo-yo, you'll need to stitch with your needle a little off center in places. Start you needle off center on your yo-yo, while stitching it onto the pocket of the bib. The stitches on the inside of the pocket should be centered and uniform while the stitches on the yo-yo be off centered, pulling it tight while stitching it down will form the folds.

Below on the next for pages is the pattern for your bib. Cut all patterns out and tape together the dotted lines. Piece one is the upper left, piece two is the upper right and so on.
